## EXECUTIVE SUMMARY

I work with a wide variety of prototyping tools and frameworks. To avoid clutter, I just kept it down to my favorites:

For my UX Design process, I mainly use Sketch, Flinto, Figma, Adobe CC.

In development I enjoy using VanillaJS + ES6, ReactJS, AngularJS, SaSS/SCSS on the Front-End, and NodeJS, ExpressJS and MongoDB on the back end.

## SKILLS: LANGUAGES & TECHNOLOGIES

- Python
- JavaScript
- NodeJS
- ExpressJS
- MongoDB
- ReactJS
- AngularJS
- Django
- Github
- Bitbucket
- NPM

## EDUCATION

**Noida Institute of Engineering and Technology**  
**B-Tech Computer Science | 2020 - Present**

### Relevant Coursework:

- Algorithms, Artificial Intelligence, Operating Systems
- Databases, Discrete Math, Probability Theory
- Data Structures, Computer Architecture
- Computer Security, Database Systems
- Data Science Techniques, User Interface Design
- Multivariable Calculus, Linear Algebra
- Object-oriented programming

## PROJECTS

**Easyemm | Angular** [Easyemm.com](https://easyemm.com)

Remote View and Control for Android Devices

2020 - Present

- Writing and reviewing great quality code
- Understanding and relating technology integration scenarios and applying these learnings in projects
- Resolving issues that are raised during code/review, through exhaustive systematic analysis of the root cause, and being able to justify the decision taken
- use cases and technical requirements and be able to convert them into technical design which elegantly meets the requirements
- Owning pushing the team towards the best working practices in the Python and JS community

## CERTIFICATIONS

**Udemy:** Complete Python Bootcamp From Zero to Hero in Python

**Udemy:** JavaScript - The Complete Guide 2021 (Beginner + Advanced)

**Google:** Google Web Designer Basics  
Google Digital Unlocked
